

Photoshop Elements Fundamentals and Creations - Video based training. Complete with all project files - you can watch the video and work on the projects - a great way to learn!

Elements4 Fundamentals DVD-Rom 1

DISK 1

Section 1 - Elements Essentials

Session 01 : Introduction to the Organizer
This session is an introduction to the Elements Organizer interface for sorting, ranking and managing your images.

Session 02 : Introduction to the Edit Workspace

A complete tour of the Elements Edit Workspace including editing, retouching and color correcting your images.

Session 03 : Introduction to the Elements Workspace

Introduction to the Elements Workspace for importing, organizing and editing your images.

Session 04 : How to Choose Your Image Size

Learn to use Image Size and Canvas Size to set image size and resolution.

Session 05 : Creating Basic Selections

See how to create basic selections using the Marquee Tools, Lasso Tools, Selection Brush Tools and Magic Wand and learn how to composite part of one image over another.

Session 06 : Layers

This session will teach you all about Layers including the different types of Layers and how to use the Layers Palette to create composited images.

Session 07 : Color Management

Learn essential color management techniques to calibrate your monitor, scanner and printer for consistent results.

Session 08 : Camera Raw

This session covers importing and working with Camera Raw files and shows non-destructive techniques to crop, rotate, sharpen and apply tonal and color corrections right in the Camera Raw interface.

Section 2 - Photo Optimizing

Session 09 : Auto Crop

See how to automatically crop images that are not level or crop multiple images that were scanned together.

Session 10 : Crop and Straighten

Learn how to crop and straighten your tilted or skewed images easily, using a variety of tools.

Session 11 : Correcting Perspective

See how to level a foundation or horizon and adjust the perspective of an image that has converging lines due to the camera angle.

Session 12 : Quick Fix

Use the Quick Fix interface to correct the brightness, contrast and color of an image and even eliminate Red Eye and sharpen your image with minimum effort.

Session 13 : Levels

Understand the Levels dialog box and how to change overall RGB levels and individual Red, Green and Blue channel levels.

Session 14 : Shadow Highlight

Learn all about the Shadow/Highlights Tool and how it can easily adjust shadows, highlights and midtone contrast.

Session 15 : Color Cast Removal

See how to remove color casts with the Adjust Smart Fix, Auto Smart Fix, Color Variations, Levels, Remove Color Cast and Adjust Color for Skin Tone tools.

Session 16 : Noise Reduction

This session covers removing noise created by digital cameras and low light using the Reduce Noise Filter.

Session 17 : Target Selective Color

Learn how to easily change the color of selected objects using the Hue/Saturation dialog box.

Section 3 - Photo Retouching

Session 18 : Red Eye

See how to quickly and easily remove red eyes in portraits with the Auto Red Eye Fix tool.

Session 19 : Blemishes and Wrinkles

This session covers retouching and removing wrinkles and spots from a portrait using the Spot Healing Brush Tool.

Session 20 : Eyes and Teeth

Learn to remove stains from teeth and clean up eyes with a paint brush using Soft Light Mode in a reduced opacity.

Session 21 : Hair Color

Change the color of someone's hair using the Gradient Fill Adjustment Layer and paint in the affected area using a Layer Mask.

Session 22 : Rejuvenating Old Photographs

Restore an old photograph to its former glory by retouching tears and spots, adjusting tonality and finally straightening and cropping the image.

Session 23 : Body Reshape

See how to lose some pounds and do some body reshaping with the amazing Liquify Tool.

Session 24 : Replace Sky

Learn to realistically replace a sky using the Magic Wand Tool to make a selection and a Color Adjustment Layer to refine your selection.

Session 25 : Remove Objects

This session shows how to remove unwanted objects from an image using the Healing Brush Tool.

The Author's of the Best Selling How to Wow Books on Photoshop for Photography, InDesign, Photoshop Elements and Photoshop for the Web.

DISK 2

Section 1 - Photo Enhancing

Session 01 : Blend Modes

Discover how to blend images and layers together with the many varieties of Layer Blend Modes.

Session 02 : Dodging and Burning

Learn how to lighten and darken areas of an image by painting tonality with soft edge brushes on additional Layers with the Overlay Blend Mode.

Session 03 : Motion Blur

Add movement and style to an image by applying a Motion Blur and painting areas in on the mask of a Levels Adjustment Layer.

Session 04 : Skin Conditioning

See how to retouch and remove a 5 o'clock shadow using the Dust and Scratches Filter and a Hue/Saturation Adjustment Layer.

Session 05 : Skin Smoothing

Smooth skin with the Reduce Noise Filter and a Hue/Saturation Adjustment Layer for a fashion photography magazine look.

Session 06 : High Contrast

This session shows how to enhance your images and add high contrast for extra punch using

Blend Modes and a Hue/Saturation Adjustment Layer.

Session 07 : High Pass Enhancement Learn how to apply a very easy sharpening and enhancing technique that utilizes the High Pass Filter.

Section 2 - Creative Projects

Session 08 : Pen and Ink Watercolor

Convert any photograph into a pen and ink watercolor artwork masterpiece using Smart Blur to create edges, Dry Brush Artistic Filter and the Texturizer Filter to add a painted canvas look.

Session 09 : Tattoo Additions

This session illustrates how to add a tattoo to anyone using text and the Warp Text Tool. Try before you buy!

Session 10 : Wrapping Paper

Create beautiful custom wrapping paper using shapes, textures, patterns and text.

Session 11 : Digital Signature

See how to make your own digital signature you can re-use anytime by converting text or a scan into a brush.

Session 12 : How to Wow Presets

This session covers installing and working with the How to Wow Elements Presets that are included on this disc.

Session 13 : Postage Stamp

Present your holiday images creatively using a postage stamp look utilizing images and graphics.

Session 14 : Book Cover

Learn how to use the Filter Gallery to enhance a composited book cover and then add a decorative border.

Session 15 : Promotional Card

Create a promo card designed for photographers using layers, shapes and How to Wow Styles and Effects presets.

Section 3 - Creative Presentations

Session 16 : PDF Slide Show

Slide night at your place? The digital answer is a PDF Slide Show that automatically runs full screen in the free Adobe Reader application and includes transitions and playback controls.

Session 17 : Multimedia Slide Show

Produce your own VCD or DVD with images, sounds, captions and transitions and see all of the options for output of your digital Slide Show.

Session 18 : Greeting Cards

Start with a simple image and use the Photo Greeting Card interface to create your own card from an existing template.

Session 19 : Scrapbooks

Scrapbooks are hot and here you will learn how to make your own custom digital scrapbook pages with patterns, textures, images and text.

Session 20 : Web Photo Gallery

Create your very own Web Photo Gallery using images and HTML Photo Gallery graphic templates that utilize thumbnails, full-sized images and navigation for easy Web browsing of your images.

Session 21 : Photomerge Panorama

Use Photomerge to composite and blend several images to create one wide angle panorama image.

Session 22 : Contact Sheets & Printing

Learn how to create and print a proof sheet of many images using the Print Selected Photos interface.

Session 23 : Picture Package Printing

See how to save paper by sizing several images to fit onto a single sheet and printing them all together.
